DETAILED ACTION

1. This is response to the After Final Amendment filed on September 14, 2005. Claims 1-2, 4-7 and 9 are pending in the application.

Allowable Subject Matter

2. Claims 1-2, 4-7 and 9 are allowed and renumbered 1-7.

Reason for Allowance

3. The present invention related to a method for displaying a bitmap italic character with high quality using a color display device by performing conversion of the first bitmap so as to generate a second bitmap character. Each independent claim identifies at least a uniquely distinct feature:

“the second bit map is generated from the first bit map by shifting each dot forming the first bit map by a shifting amount which is proportional to a distance from a reference line running along the predetermined direction set in the first bit map by a dot”

The closest prior art of Koyama et al. (U.S Patent No. 6,524,161) describes a method of displaying regular character, and Hitchcock (U.S Patent No. 6,236,390) discloses a character bitmap display using sub-pixel, but either singularly or in combination, fail to anticipate or render above quoted limitations obvious.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
